Sprint 2

This table is the tasks for the Sprint 2 that are needed to be done

Task	**Amount of time**
Implement bcrypt for password hashing	This is a crucial security feature and might take a few days to implement this task properly. (October 1st to October 4)
Designing the login page	It will take one day (October 1)
Frontend features of the login page and register page	Designing and implementing frontend features should take about a week(October 1st to october 8th)
Account schema for backend	The foundational task of setting up the backend schema should be finished in a few days (October 1st to October 4th)
Setup PrismaDB and MongoDB	Setting up the database can vary in complexity but should be achievable within a week (October 1st to October 8th)
Use React filters for search categories	This can be a moderately difficult task that takes two weeks to complete (October 4th to October 11th)
Frontend features modification using Tailwind CSS	Although it should be a continuous process, the frontend can initially be changed in a week (October 4th to October 11th)
Setup backend schema	Can be done in a week (October 4th to October 11th)
Create React components for listing cards	Developing these components might take about a week (October 6th to October 13th)
Frontend features modification using Tailwind CSS	Ongoing frontend work, but initial implementation can be completed in a week (October 11th to October 18th)
Create like or dislike functionalities	This might take a week (October 11th to October 18th)
Create favorite page and endpoint for users	Developing these features can take approximately 2 weeks (October 11th to October 25th)
Frontend features for the favorite page using Tailwind CSS	Ongoing front-end work, with a week for initial deployment (October 18th to October 25th)
